v. 13, no. 12, p. 572-579.

DESCRIPTORS: *Cements, *Brick, Microanalysis.

The microstructure of a clinker is dependent upon the chemical composition and the technical influencing factors. The effect of these factors (which include the preparation of the raw material, the burning conditions and the rate of cooling) on the microstructure of the clinker is described with the aid of a large number of photographs.
